

INDUSTRIAL GUARD

Solutions suitable for the bottling, packaging,
pharmaceutical, cosmetic, food and industrial sector.

Advice

The know-how gained in years of experience allows the MarmoinoX team to understand the needs and to advise on the best custom-made solutions.

Production

The perimeter protections are designed by the design team so that they are tailored to the customer's technical and aesthetic needs.

Production

All the production phases of the protections are carried out internally at MarmoinoX with latest generation machines and a lean approach.

Assembly

All the production phases of the protections are carried out internally at MarmoinoX with latest generation machines and a lean approach.

Service

User manual and required certifications accompany the machinery, in addition to the information necessary to ensure proper maintenance.

The vanguard of industrial protection

Protections by MarmoinoX are the result of passion and research, coming from the interest in innovation and the fifty years' experience.

Projects are studied to the detail by a department of technic designers and are accompanied by a strong after-sale support.

They are different from all the other ones: they are supported by specialized teams on safety regulations, machine and hygienic.

360 ° consulting and declarations of conformity on your machinery.

MarmoinoX employs collaborators prepared on certified European standards, in order to create safe and qualified products. The specialized staff is attentive to the control of all the specifications requested by our customers, starting from the support in the technical development.

On request we also offer:

- CE certifications;
- certified glasses;
- declarations of conformity;
- user manual accompanying the machine.

We also offer and organize in-house training courses for our customers and our partners, in order to keep them up to date on safety regulations.

Regulation

It complies with the following European Directives:
Machinery directive 2006/42/EEC

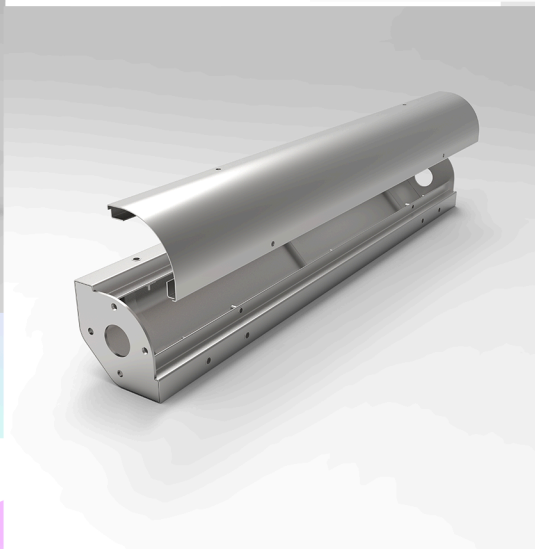

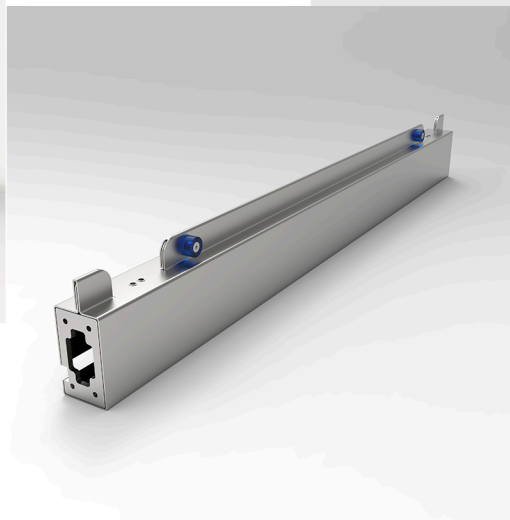

It complies with the following harmonized standards:

- UN EN ISO 12100:2010
- UN EN ISO 14120:2015
- UN EN ISO 14122-1:2016
- UN EN ISO 14122-2:2016
- UN EN ISO 14122-3:2016
- UN EN ISO 14122-4:2016

SOLUTIONS PROVIDED

Clear Guard

Guards characterized by a transparent and very clear design

MarmoinoX Guard

Its profile is able to reduce assembly and cabling times, without neglecting hygienic design

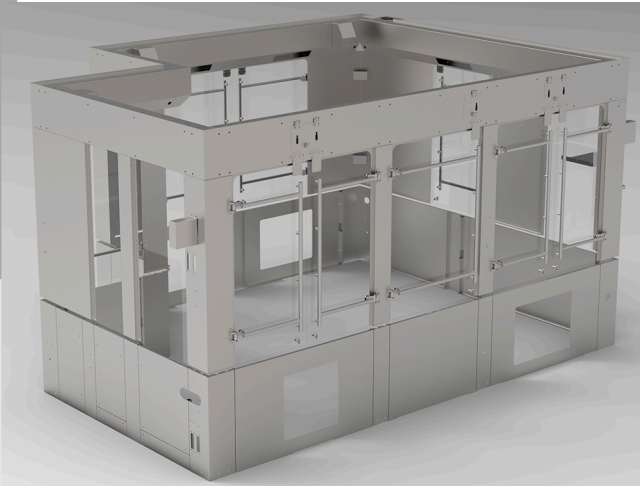

Inox Guard

Steel is the main character. The solidity integrates with its attractive line

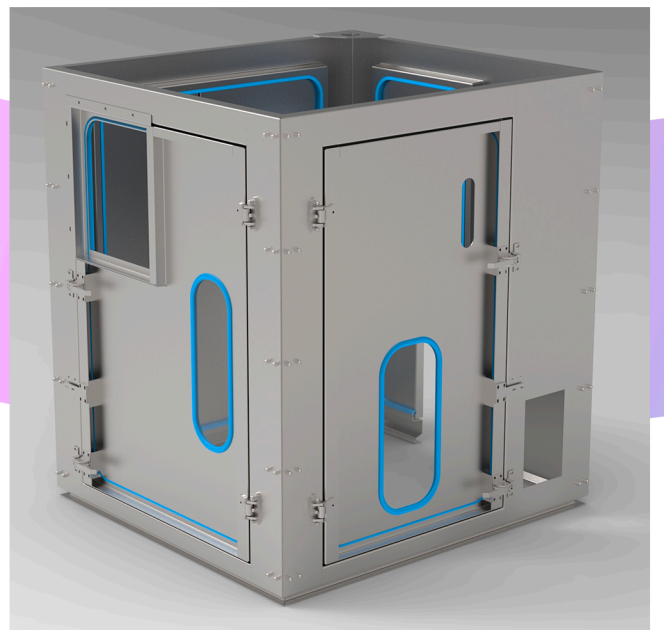

Hybrid Guard

Guards characterized by a transparent design. Steel is the main character. It combines the strength of steel and a clear and light design

Hd Guard

Hygienic design for a simple cleaning in symbiosis with clear lines

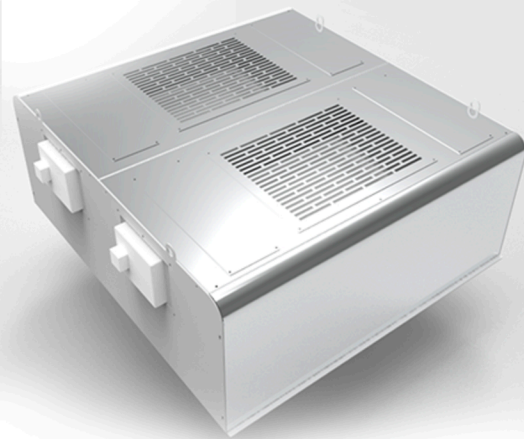

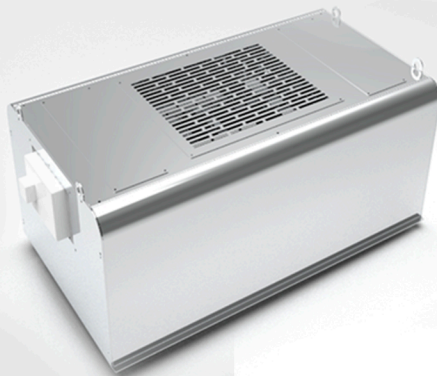

Net Guards

The distinguishing features are strength and a modular construction to make faster the assembly. Also available in inox steel

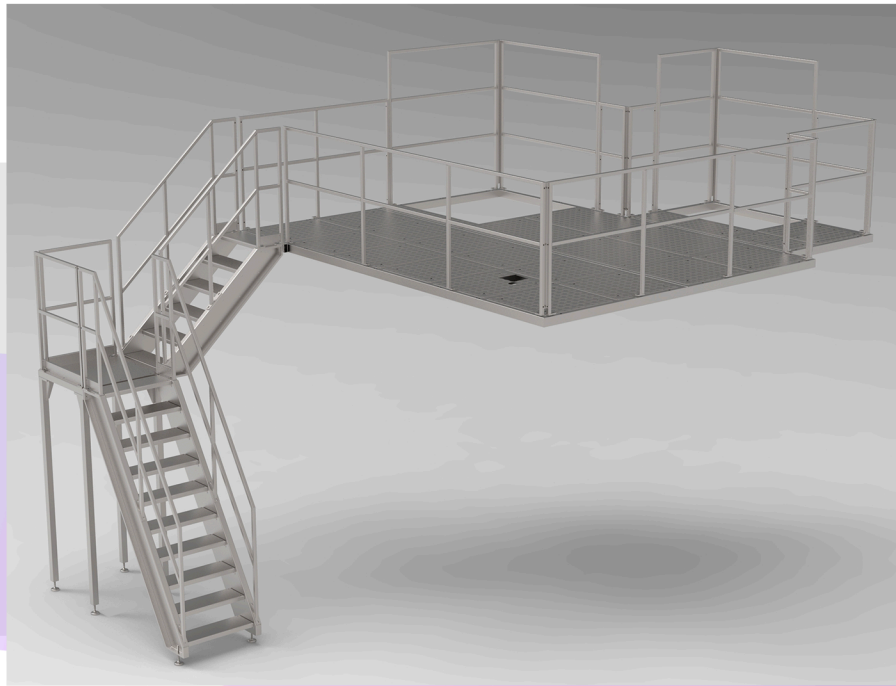

Laminar Flows

Machines realized to equip controlled contamination working areas ISO 14644 and GMP rules.

Doorway to machineries

Handles and Hinges

Handles

Easy assembly;
Clean lines;
Focused on design and budget

Hinges

Strong, with mechanical
stop adjusted with 60° of
excursion
